Kirti Joshi

Senior Software Engineer | React.js Developer

Senior Software Engineer with 8+ years of experience building scalable React applications for enterprise and financial services. Focused on accessible interfaces, reusable component systems, maintainable architecture, and reliable feature delivery.

PROFESSIONAL EXPERIENCE

Mphasis | HP

Senior Software Engineer

Aug 2022 - Present

- Own and deliver end-to-end features in a large-scale React application, working closely with design, backend, and QA teams.
- Build reusable, customizable components in Storybook and improve modularity with hooks, higher-order components, and Context API.
- Write unit and integration tests with Jest and React Testing Library; resolve bugs and performance issues across modules.
- Lead an accessibility initiative covering WCAG guidelines, ARIA roles, and screen reader support.
- Review code, mentor junior developers, and contribute to sprint planning and Agile ceremonies.

Capgemini | Synchrony Bank

Consultant | UI Developer

Jan 2021 - Aug 2022

- Developed scalable interfaces with React 16.8 and 17, Redux, and TypeScript, with cross-browser and device compatibility.
- Partnered with business analysts and product owners to clarify UI requirements and deliver features on schedule.
- Implemented Redux actions and reducers and contributed to the React 17 upgrade.
- Used Storybook for isolated components and React Testing Library for unit and integration coverage.
- Conducted daily code reviews and maintained client coding standards.

Acnovate | 3D Portal | Adidas | Comment Tool

Software Developer

Jul 2018 - Jan 2021

- Built responsive interfaces for the 3D Portal using React and Redux, from September 2019 to January 2021.
- Developed UI components and application logic for the Adidas Development Extension Project with React 16.8, TypeScript, and HTML5, from October 2018 to September 2019.
- Integrated REST APIs for CRUD operations and implemented Excel data exports in the Comment Tool, from July to October 2018.
- Worked directly with stakeholders to refine requirements and collaborated with QA to troubleshoot issues.

SKILLS & TOOLKIT

Front-end development

React.js | JavaScript (ES6+) | TypeScript | HTML5 | CSS3 | SASS | Bootstrap

State & architecture

Redux | Context API | React Hooks | Higher-order components | REST APIs

Testing & quality

Jest | React Testing Library | Enzyme | Storybook | Accessibility | Chrome DevTools

Tools & collaboration

Git | Webpack | Babel | NPM | Jenkins | Figma | VS Code | Agile / Scrum | Jira
